[Portfolio](#)

Terebovlia, Ukraine

PROFILE

Python backend and agentic AI engineer building production web services, Telegram bots, business automation and AI-assisted workflows. Commercial client projects since 2023, with earlier software built for my own business since 2012. Experienced with API design, RAG, service integration, containerized deployment and operational tools.

EXPERIENCE

LeadB | Middle+ Agentic Engineer

2026 - present

Python backend and agentic AI engineering. Product details are confidential under NDA.

LeadB | Middle Python Backend Developer

2025 - 2026

Backend development and service integration; project specifics are confidential under NDA.

Independent software developer

2023 - present

Delivered client-facing Python services, Telegram bots, CRMs and AI applications across civic, education and SaaS use cases.

SELECTED PROJECTS

Terebovlia Info AI | 2025

[View project](#)

Built a community information platform with FastAPI APIs, aiogram assistant and Django admin. RAG combines multilingual embeddings, Qdrant semantic retrieval and an LLM to answer from curated knowledge and catalog data. The React frontend was developed by a teammate.

Python, FastAPI, aiogram, Django, PostgreSQL, Redis, Qdrant, Docker

SUMMYZE | 2025

[View project](#)

Developed an AI email analytics SaaS with ticket summaries, categorization, search, chat and scheduled reports. Built the FastAPI app and gateway; isolated client Docker instances are provisioned with PostgreSQL, RabbitMQ-backed email processing and a self-hosted Mailu server.

Python, FastAPI, PostgreSQL, Docker, RabbitMQ, Mailu, JavaScript

RRepair CRM | 2023

[View project](#)

Built a custom repair-shop CRM covering orders, parts inventory, technician payroll and customer communication. A Django backend and aiogram bot operate over PostgreSQL in a service-based architecture.

Python, Django, aiogram, PostgreSQL, Docker

HVAC School Bot | 2026

[View project](#)

Created a Telegram learning platform with one-time invitations, video lessons, quizzes, progress tracking and teacher review of written answers. Built the aiogram bot, Django admin and FastAPI webhook service.

Python, aiogram 3, Django, FastAPI, Docker, nginx

Water Bot v2 | 2026

[View project](#)

Built a Telegram and web service for submitting water-meter readings, monthly reminders and staff workflows with filtering, processing status and Excel export for a local utility.

Python, aiogram 3, FastAPI, SQLite, Docker Compose

SmartSES | 2026

[View project](#)

Built solar-station monitoring across ESP32 firmware and a FastAPI service: BLE battery telemetry, MQTT transport, a live WebSocket dashboard, charge scheduling, Telegram alerts and read-only MCP tools for AI agents.

Python, FastAPI, ESP32, BLE, MQTT, WebSocket, MCP

TECHNICAL SKILLS

Core: Python, FastAPI, Django, aiogram, PostgreSQL, SQL, REST APIs, Docker, Linux, nginx, Git

AI and integration: RAG, Qdrant, LLM integration, MCP, Redis, RabbitMQ, Telegram Bot API

Frontend and other: JavaScript, HTML, CSS, Bootstrap, HTMX; working knowledge of Go and React

EDUCATION

Bachelor's degree in Computer Systems and Networks

1999 - 2004
